

# Privacy Policy

**Effective Date:** December 1, 2025

**App Name:** Smart-Home Geo-Fencing

**Developer:** AeroPath Consulting LLC

---

## Introduction

Smart-Home Geo-Fencing (“the App”) is designed to automate your smart home using location intelligence. We value your privacy and are committed to protecting your personal information. This Privacy Policy explains how the App handles data, what information is collected, and how it is secured.

---

## Information We Collect

- **Location Data:** The App uses native iOS location services to monitor your device’s location in the background. This is required to trigger geofence automations.
- **Geofence Settings:** Custom geofence names, radius, and webhook configurations are stored locally on your device.
- **Authentication Data:** Face ID, Touch ID, or passcode authentication may be used to secure access to the App.

**Important:** The App does **not** collect, transmit, or store your location or personal data on external servers. All information remains on your device.

---

## How We Use Information

- **Automation Triggers:** Location data is used solely to determine when you enter or exit a geofence, enabling webhook calls to your smart home platforms (e.g., Hubitat, Home Assistant, IFTTT).
  - **Notifications:** The App may send local notifications when a geofence boundary is crossed.
  - **Security:** Authentication ensures only authorized users can access the App’s settings.
-

## Data Storage & Security

- **Local Storage:** All data is stored securely on your device.
  - **Encryption:** Sensitive information is protected using **AES-256 military-grade encryption**.
  - **Keychain Protection:** Encryption keys are stored in the iOS Keychain.
  - **No Cloud Accounts:** The App does not require account creation or cloud storage.
- 

## Sharing of Information

- **No Third-Party Sharing:** The App does not share, sell, or transmit your data to third parties.
  - **Webhooks:** When configured, the App sends webhook requests (GET or POST) to endpoints you specify. These requests may include location event triggers but are only sent to services you control.
- 

## Analytics & Tracking

- **No Analytics:** The App does not use third-party analytics services.
  - **No Tracking:** Your location is never sent to AeroPath Consulting LLC or any external server.
- 

## User Rights

- **Control:** You may delete or modify geofence settings at any time.
  - **Permissions:** You can revoke location permissions in iOS settings, though this may limit functionality.
  - **Transparency:** The App is open to security audits to ensure compliance with privacy standards.
- 

## Children's Privacy

The App is not intended for use by children under 13. We do not knowingly collect personal information from children.

---

## **Changes to This Policy**

We may update this Privacy Policy from time to time. Any changes will be posted within the App or on our website.

---
